

Chorus Gateway Program

The Chorus Gateway Program allows year 12 and 13 students to get an overview of what it takes to work in the telecommunications industry. Students will learn practical skills to apply toward a future career in telecommunications.

NZQA UNIT STANDARDS		
Level	2	3
Title	Demonstrate knowledge of the telecommunications industry	Demonstrate knowledge of telecommunications optical fibre network infrastructure
Credits	6	15

The Course:

The program is run one day per week over eight weeks and is made up of two unit standards totaling 21 credits at Levels 2 and 3. The course is run by iskills, a Category One NZQA private training establishment that offers the only telecommunications technician apprenticeship in New Zealand. This course will include classroom-based learning, hands-on network lab activities, and in-field observation. Students may be introduced to industry contacts regarding employment and recruiting opportunities following successful completion of the course.

We look for students who:

- Show an interest in the future of technology
- Enjoy learning about modern tech devices such as mobile, tablet, and device applications
- Have a natural curiosity of how technologies work
- Are innovative and enjoy new challenges
- Work well with teams

REQUIREMENTS	
Cost	There is no cost for this course however we ask that schools supply steel capped footwear
Equipment	Students will be provided tools and other personal protective equipment
Travel	Students are responsible for getting to the training venue each morning
